

SEMI-PERMANENT MAKEUP.

EYEBROWS/EYELINER/BEAUTY SPOT/MICROBLADING

6 weeks until
you can
repeat the
process

Everything on this form would have been verbally explained to you during your treatment.

- Please apply your aftercare gel three times a day.
- Please keep the brows dry and away from water for the first 5 days.
- Please avoid any picking or scratching on the brows until they fully heal.
- Please avoid any scrubs, exfoliating, skin peels or facial treatments for 28 days after your semi permanent makeup.
- You will lose 40% of the colour within the first 7-10 days.
- The brow colour will fade therefore the shape may change and that is why we do a second top up 4-6 weeks following your first appointment.
- Some people need a third top up, if this is required an additional cost may be added.
- Your brows are semi permanent, so they will need topping up every 1-2 years (This all depends on how well your skin holds the pigment and your lifestyle).
- Once you have had your second top up, it is recommended to use spf30. This can help maintain the longevity of your brows.
- Your top up is required 4-6 weeks following your treatment, this is the correct time for the skin to be healed.
