

## INDIVIDUAL EYELASH EXTENSIONS

Today you may have had individual eyelash extensions involving mink/ russian volume / classic mink lash extensions.

YOUR AVERAGE  
LASH CYCLE COMES  
EVERY 28 DAYS  
/ 6 WEEKS

Keep eyelashes dry for the first 48 hours after application.

Avoid any oily products on or close to the eyelash extensions.  
Brush the lashes when necessary.

Try and avoid getting the lashes wet where possible. Do not pick the lashes off or rub the eyes.

Infills are due around 2-4 weeks after application, this time frame depends on how well the lashes are cared for after and where your lash cycle stands.

Water/steam/heat will contribute to the lashes shedding faster.

Classic lash extensions are known to shed faster as they are more singular application.

It is important to keep your eyes clean, I suggest having the water run through your eyes in the shower once a week.
